

## **AgJunction Acquires GAC2 Controller Business from Argentinian Supplier, Forkworks**

**Hiawatha, KS, December 19, 2016** - AgJunction, Inc. (TSX:AJX), a leading provider of innovative hardware and software solutions for precision agriculture, has purchased the business assets, software, hardware, intellectual property and manufacturing rights of the GAC2 controller product from long term AgJunction supply partner, Forkworks.

AgJunction incorporates GAC2 into the Outback Guidance® brand and markets the controller as AC110, an existing technology that allows AgJunction to interface its section and rate control into a wide variety of implements throughout the precision agriculture marketplace.

“Adding the GAC2 controller to our in-house technology portfolio enables us to expand our machine control offerings to reach a wider range of customers and markets,” said Joshua Gattis, director of application control for AgJunction.

While specific terms of the transaction were not disclosed, included in the agreement is a technology license that will enable both companies to continue to develop and sell into their respective markets.

### **About Forkworks and their Plantium product**

Forkworks ([www.plantium.com](http://www.plantium.com)) provides cutting-edge hardware and software solutions and applications for precision agriculture. For the last 15 years, Forkworks has been designing, developing and manufacturing under its own brand. Such products include the well-known line of SBOX displays, steer automatic pilots, and planting, harvesting and spraying solution. Forkworks is headquartered in Villa Constitución, Santa Fe, Argentina and has satellite offices in Rosario, Santa Fe, Argentina. For more information, please visit [www.plantium.com](http://www.plantium.com).
